Summary

Hard-working web developer with +1 year of programming experience and flair for creating elegant solutions in the least amount of time. I primary focus on learning by doing and building proyects, currently more than 20 projects built, I am always looking for new ways to improve myself. Passionate about software development and technology.

Projects

You can find all my projects and the technologies I've used to build them here: https://bit.ly/all-the-projects

Full Stack User Registrarion App: https://bit.ly/3KPtWuh
MonogoDB | Express | React | NextJS | Node.js | TypeScript | Webpack

Full Stack user registration and login page, this app has the following features:
* User registration and login
* User authentication and authorization using jsonwebtoken
* Password hashing
* User data storage in a database
* Redirects depending on the user's current authentication status
* Updates user data in the database

Full Stack PERN Tasks App: https://bit.ly/pern-tasks
PostgreSQL | Express | React | Node.js | TypeScript | Webpack | TDD: Mocha Chai

A fullstack PERN Stack Tasks App . This app is a simple todo list app that uses the PERN Stack, where the user can create tasks, edit them, and delete them. The backend is deployed on Heroku and the frontend is deployed on Netlify.

Full Stack Movie Reviews App: https://bit.ly/3CcvhXA
MongoDB | Express | React | Node.js

Full Stack JavaScript application, made with the MERN stack. This app fetches movies from a Mongo database, you can also login and post a review, update or delete the reviews you have made in the database.
